filmmaker jay holben has been battling in the production trenches for most of his life for

the past 17 years he's chronicled his adventures in the pages of *American Cinematographer*, *Digital Video*, *Videography* and *TV Technology*. Now in *Behind the Lens*, dispatches from the cinematic trenches he's compiled nearly 100 of his best articles on everything from camera technology and lenses to tips and techniques for better lighting. Whether you're making independent films, commercials, music videos, documentaries, television shows, event videos or industrials, this full-color collection provides the tools you need to take your work to the next level and succeed in the world of digital motion imaging. Featured topics include tech including the fundamentals of how digital images are formed and how they evolved to match the look of a film, as well as image compression and control, optics, providing a thorough examination of lenses and lens interchangeability, depth of field, filters, flare, quality, MTF and more. Cameras instructing you in using exposure tools, ISO, white balance, infrared and stabilizers. Lighting featuring advice on using lighting sources and fixtures and how to tackle common lighting problems. Additional tips and tricks cover improving audio, celestial photography, deciding if film school is right for you and much more. For over a decade, Jay Holben has worked as a director of photography in Los Angeles on features, commercials, television shows and music videos. He is a former technical editor and frequent contributing writer for *American Cinematographer*, the current technical editor and columnist for *Digital Video* and the lighting columnist for *TV Technology*. The author of *A Shot in the Dark*, a creative DIY guide to digital video lighting on almost no budget, Holben is also on faculty for the Global Cinematography Institute. He is now an independent producer and director.

The first of its kind, this book traces the evolution of motion picture technology in its entirety, beginning with Huygens' magic lantern and ending in the current electronic era. It explains cinema's scientific foundations and the development of parallel enabling technologies alongside the lives of the innovators, product development issues, business and marketplace factors, the interaction of aesthetic and technological demands and the patent system. All play key roles in the tale. The topics are covered sequentially with detailed discussion of the transition from the magic lantern to Edison's invention of the 35mm camera, the development of the celluloid cinema and the transition from celluloid to

digital unique and essential reading from a lifetime innovator in the field of cinema technology this engaging and well illustrated book will appeal to anyone interested in the history and science of cinema from movie buffs to academics and members of the motion picture industry
