nation constitutionalism and buddhism in sri lanka offers a new perspective on contemporary debates about sinhalese buddhist nationalism in sri lanka in this book de silva wijeyeratne argues forcefully that sinhalese buddhism in the period prior to its engagement with the british colonial state signified a relatively unbounded although at times boundary forming set of practices that facilitated both the inclusion and exclusion of non buddhist concepts and people within a particular cosmological frame juxtaposing the premodern against the backdrop of colonial modernity de silva wijeyeratne tells us that in contrast modern sinhalese buddhist nationalism is a much more reified and bounded concept one imagined through a 19th century epistemology whose purpose was not so much inclusion but a much more radical exclusion of non buddhist ideas and people in this insightful analysis modern sinhalese buddhist nationalism then emerges through the conjunction of discourse power and knowledge at a distinct moment in the trajectory of the colonial state an intrinsic feature of this modernist moment is that premodern categories such as the cosmic order were subject to a bureaucratic re valuation that generated profound consequences for state society relations and the wider constitutional legal imaginary this book goes onto explore how key constitutional and nation building moments were framed within the cultural milieu of modern sinhalese buddhist nationalism a nationalism that reveals the power of a re valued buddhist cosmic order to still inform the present given the intensification of the sinhalese buddhist nationalist
