inadvertently carrying exotic organisms back to earth on our spacecraft we also risk the release of biohazardous materials into our own ecosystem such concerns were recognized by scientists even before the 1957 launch of sputnik this book presents the history of planetary protection by tracing the responses to the above concerns on nasa s missions to the moon mars venus jupiter saturn and many smaller bodies of our solar system the book relates the extensive efforts put forth by nasa to plan operations and prepare space vehicles that return exemplary science without contaminating the biospheres of other worlds or our own to protect irreplaceable environments nasa has committed to conducting space exploration in a manner that is protective of the bodies visited as well as of our own planet
